PROFESSIONALSUMMARY

Experienced Senior SDET with 5+ years of expertise in Agile, JUnit, TestNG, Cucumber/Java, Selenium WebDriver, SQL, and RESTful API testing. Skilled in leading cross-functional teams, driving process improvement, and delivering high-quality software products. Proficient in test automation frameworks and tools, with strong problem-solving and communication abilities. Dedicated to delivering outstanding results within tight deadlines while prioritizing customer satisfaction. Seeking an engaging Senior SDET role to leverage 5+ years of experience and make a substantial impact on the success of a cutting-edge organization.

EXPERIENCE

SENIOR SDET

May 2016 – Mar 2022

At Metro Holding, I began my journey as a Test Automation Engineer, responsible for developing and implementing automated testing solutions to ensure software quality. Over the years, I have not only enhanced my skills but also taken on progressively more significant responsibilities, leading to a promotion to the position of Senior SDET.

As a Test Automation Engineer, I played a pivotal role in developing a data-driven test framework in Selenium WebDriver, leveraging Apache POI for Excel integration. This initiative resulted in a remarkable 30% increase in test coverage, showcasing my commitment to improving testing practices.

My collaboration with cross-functional teams was instrumental in maintaining high standards of software quality. I effectively utilized GitHub for version control management, fostering seamless collaboration with the development team and ensuring code integrity.

In addition, I identified, documented, and tracked software defects using JIRA, working closely with development teams to uphold quality standards.

Recognizing the importance of automated testing within a CI/CD pipeline, I smoothly integrated test automation using Jenkins, ensuring automated testing during build and deployment processes, thus enhancing overall testing efficiency.

My journey at Metro Holding reflects my dedication to continuous improvement, skill development, and my ability to handle increasing responsibilities. As a Senior SDET, I am now well-versed in all stages of testing, including Smoke Test, Functional, Backend, User Acceptance Testing (UAT), Positive/Negative, and Regression testing. I actively participate in Agile ceremonies, contributing to the continuous improvement of software testing processes and overall team efficiency. I have also mentored and trained five team members on automation testing, resulting in a 25% increase in productivity.

EDUCATION

Dokuz Eylul University

Bachelor of Business Administration

Equipped with comprehensive knowledge in management, finance, MIS, marketing, and operations. Developed analytical skills and effective communication to drive business success. We had also major program which allow me to get a major degree on Management Information System.

CERTIFICATION

GoogleDataAnalyticsCertificate

July 2022

Demonstrated expertise in data analysis through comprehensive training in data visualization, data querying, and data cleaning. Proficient in leveraging analytical tools and techniques to extract meaningful insights and drive informed decision-making.

TECHNICALSKILLS

TestingTools: Selenium WebDriver, Eclipse, IntelliJ, JUnit, Maven, Cucumber, TestNG, Git, Jenkins

TrackingTools: Jira

Languages: JAVA, SQL, HTML, XML

OperatingSystem: Windows, Mac, IOS

Database: Oracle, MySQL, SQLServer

Framework: Page Object Model, Data Driven Testing, Behavior Driven development

TestingMethods: Smoke Testing, System Testing, Integration Testing, UAT Testing, Functional Testing, Regression Testing, Black Box Testing, Security Testing and Backend Testing.
